Professional Summary

Software Engineer with 3+ years of experience designing and scaling web services, cloud infrastructure, and data pipelines. Proven track record in developing high-throughput REST APIs with Python and FastAPI, and crafting interactive frontend applications using TypeScript and React.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, Bash

Frameworks & Web: FastAPI, Django, React, Next.js, Node.js

Databases & Caching: PostgreSQL, Redis, MongoDB

DevOps & Tools: Docker, Kubernetes, Git, GitHub Actions, AWS, Linux

Professional Experience

Software Engineer — TechNova Solutions (2022 – Present)

- Architected backend microservices in Python & FastAPI serving over 150,000 daily active users.
- Spearheaded frontend redesign using React and TypeScript, decreasing page load time by 38%.
- Containerized 12 core services using Docker and configured automated CI/CD workflows via GitHub Actions.
- Optimized PostgreSQL database queries and connection pooling, reducing p99 response latencies by 45%.

Featured Projects

Distributed Task Queue Engine: Built a lightweight task queue in Python and Redis featuring automatic retry policies and worker thread autoscaling.

Real-time Analytics Dashboard: Created an event tracking dashboard using Next.js, WebSockets, and TailwindCSS for live metrics visualization.
